

SMART RIPPER®

New and Improved

We've improved SMART RIPPER and the Audio Format Converter! In addition to the ability to extract a perfect digital copy of an original CD track, (in a fraction of real time, while preserving each song in its original crystal-clear state with built-in normalization) you can now convert your files into PCM, MP2, and MP3*.

More Features

The new SMART RIPPER software system (with MP3 support) gives current clients the ability to convert audio to MP3 format - with a one-time upgrade charge. In addition to the MP3 features, we've streamlined the user interface for the AFC and added performance enhancements to SMART RIPPER.

Transfer Audio with a Click

SMART RIPPER is the ideal way to digitally copy music and audio tracks to hard drive. Only SMART RIPPER uses the latest ripping and compression technology to load CD audio simultaneously across multiple CD-ROM devices.

World Class Support

Our Support department is legendary. All the people who help you solve your day to day problems are radio people, too. RCS Support never sleeps and is always open 24/7/365 for SMART RIPPER users worldwide.

Features

- Extract a perfect digital copy of an original CD track in a fraction of real time.
- Optimize levels across multiple tracks and CDs with built-in normalization.
- Convert your audio files into PCM and MPEG 1 Layer 2 (MP2), and Layer 3 (MP3)*.
- SMART RIPPER supports ripping into PCM, MPEG Layer 2 (MP2) and Windows Media (WMA).
- Automatically trims silence.
- Preview audio by playing directly from CD through sound card.
- Creates DAT (metadata) files for importing metadata into NexGen.
- Support to get CD track title & artist information from the Internet.
- Throttled network access and CPU utilization.
- SMART RIPPER can rip from multiple drives simultaneously.
- Integrated SMART RIPPER is tightly coupled with NexGen to allow ripping cuts from the Production screen or Audio load utility.
- Standalone SMART RIPPER can communicate with NexGen's database to select an available audio number for the cuts it rips.

SMART RIPPER®

- A separate license is required to export MP3 files.

Technical Requirements

- A CD ROM on the same machine as the software is required.
- Hard disk space: at least 1 GB
- Clock speed: at least 3 GHz (P4)
- Memory: at least 1 GB of RAM
- Operating System: Windows XP Professional is recommended. Windows XP Home, Windows Server 2003, Windows 2000 and Windows Vista are acceptable.
